

*We invite your contributions to the Special Issue of
Japanese Psychological Research:
Vol.66 No.1 (January / 2024)*

[Special Issue]

Motivation for the Future

We often think about the future because we always live in the future. However, the future we imagine might not become a reality. What are the factors promoting the motivation to make our imagined futures real? These factors could include motivations for ideals, goals, acquisitions, transformations, growth, self-control, inheritance, and maintenance, among others. Do these motivations for the future give us what we desire? In the last few decades, research on motivation for the future has increased, and many theories (principles) have been proposed to improve people's motivation for the future. This special issue aims to introduce recent empirical and theoretical developments in psychological research on motivation for the future. In this special issue, we welcome not only empirical studies, but also various types of studies, including meta-analyses and reviews, on motivation for the future. We wish to promote the research on the motivation for the future by integrating and interpreting past research.

[Editors]

Miki Toyama
(University of Tsukuba)

Takashi Arai
(Tohoku University)

Deadline for abstract submission:
August 31, 2022

Deadline for full paper submission:
January 31, 2023

Please email an abstract (no more than 500 words) for your proposal to the editors of this special issue, Miki Toyama (mtoyama@human.tsukuba.ac.jp) and Takashi Arai (t-arai@tohoku.ac.jp), by August 31, 2022. Authors who are invited to submit full manuscripts will be notified by September 30, 2022. Full manuscripts will be due by January 31, 2023. Full manuscripts will follow the journal's author guidelines (<https://onlinelibrary.wiley.com/page/journal/14685884/homepage/forauthors.html>) and review process.
